PROFESSIONAL SUMMARY

Systems Engineering student with Full Stack development experience (Java, C#, React, .NET, PostgreSQL). Recognized for leadership, adaptability, passion for competitive programming, modern software development, and teaching diverse social groups.

TECHNICAL SKILLS

Programming Languages

- C++, Java, Python, R, JavaScript, Ruby, C#

Frontend

- HTML5, CSS3, JavaScript
- React, Angular, Bootstrap

Backend

- C#, Java, Ruby, Python

Databases

- MySQL
- PostgreSQL

Tools and Methodologies

- Git & GitHub
- Postman
- Agile Development / Scrum
- RESTful API Design
- AI-Assisted Development with Claude Code and Open Source

LANGUAGES

- Spanish - Native
- English - Advanced (C1):
 - Technical reading: Fluent
 - Written communication: Advanced
 - Oral communication: Intermediate-Advanced
- German - Basic (A2):
 - Technical reading: Basic
 - Written communication: Basic
 - Oral communication: Basic

EDUCATION

Bachelor's Degree in Information Systems Engineering | *Universidad Nacional de Costa Rica*

2022 - Present

- GPA: 7.8/10
- Relevant Courses: Data Structures, Programming Paradigms, Databases, Database Administration, Mobile Application Development, Systems Engineering

PROFESSIONAL EXPERIENCE

Developer | *Datacor*

2025 - 2026

- Developed a web application focused on centralizing internal processes such as Interviews, Candidates, Reimbursements, Settlements, and Vacations
- Implemented the developed system called OfficeCore for their employees
- Collaborated in a team of 6 UNA student representatives to implement the OfficeCore system

Independent Developer | *Student Electoral Tribunal of Universidad Nacional de Costa Rica*

2026 - Present

- Developed a web application focused on virtual voting, guaranteeing voter anonymity and registration through institutional accounts, verifying each user via security codes
- Implemented the developed system called U-Vote, achieving university savings of 10 million colones in similar system contracts

Private Tutor | *Universidad Nacional de Costa Rica*

2024 - 2026

- During my time in the Systems Engineering program, I offered my experience in competitions and projects to first-year and advanced students to improve their programming logic skills in C++ and academic performance

Mentor | *Universidad Nacional de Costa Rica*

2025 - 2026

- In the Systems Engineering program, I have been an active student and stood out in the School of Informatics Mentors team, providing logistical support to the institution and instructing first-year students by creating support material about the program

FEATURED PROJECTS

OfficeCore | *C#, React, PostgreSQL*

- OfficeCore is a human resources and internal process management system to centralize and reduce employee documentation and data
- Repository link: <https://github.com/Benjamin-Solano/OfficeCore-Frontend>

U-Vote | *Java, React, PostgreSQL*

- U-Vote is a web system capable of managing authorized emails, generating and managing elections, and displaying detailed reports of process results through charts and PDF delivery
- The Student Electoral Tribunal of Universidad Nacional de Costa Rica (TEEUNA) did not have a unified system to conduct virtual voting at various campuses throughout the country and had to contract external systems to expedite vote counting processes. U-Vote's impact represents annual savings of at least 10 million colones for TEEUNA
- Repository link: <https://github.com/Benjamin-Solano/U-Vote>

PROGRAMMING COMPETITION EXPERIENCE

Competitive Student | *International Collegiate Programming Contest (ICPC)*

- In 2025, I participated for the first time representing Universidad Nacional de Costa Rica as a team in the ICPC Central America edition, achieving 58th place out of 90 participants, thus improving my programming skills and career vision

CERTIFICATIONS AND COURSES

- Scrum Fundamentals Certified (SFC) - SCRUMstudy, 2026
- Claude Code In Action - Anthropic Skillkar, 2026
